SERVICES

•••• TRANSPORTATION ••••

Comprehensive service with a broad range of additional features

PRIMARY & SECONDARY

Be it a package, pallet or container, high-priority delivery or a less urgent, competitively priced freight. Direct complete load or consolidated shipment via hub or Multi-modal delivery: our customers can always count on the expertise of RBTC in the transport business.

And this is how RBTC experience combines with the passion to form the perfect basis for a complex yet transparent service for national distribution.

Comprehensive service with a broad range of additional features

DEDICATED & FIXED

With the power of our asset-based fleet professional company drivers and industry-based customer service, we truly specialize in dedicated transportation services.

After we have evaluated your specific transportation needs, we will provide you with dedicated equipment and resources as an alternative to traditional truck-load carriers, giving your company a dedicated service at a truck-load price.

This complete transportation solution is designed to eliminate the financial and administrative burden of owning your own equipment while still providing you the service levels of a private fleet.

Fleet Details

SN Fastway Logistics -

Delivery Performance and Tracking

- Driver performance is continually monitored using GPS in all vehicles. Delivery times on all routes are strictly monitored ensuring vehicle is reaching well within the stipulated time.

Automated Fleet Management

- We utilize smart fleet management software to optimize routes and reduce fuel consumption, ensuring timely deliveries and cost savings.

Auto E-way Bill Extension

- We provide a solution of generating alarms and notifications to remind the users about their E-way bills which are expiring soon and bulk extending them with a click

Digitalized Locks

- We are in process of implementing Digitalize locks on all of our truck. It secures cargo, reduces theft risks, and ensures equipment safety during transportation and storage
- OTP-based unlocking. Drivers receive a one-time password on their mobiles for vehicle unlocking—a feature that adds an extra layer of security.
